Why Clinical Research?

Pharmaceutical industry all over the world has gained an unmatched momentum, making Clinical Research one of the lucrative careers in recent times. Since the niche pharmaceutical products from various pharmaceutical industries have touched down in terms of its time span, the new avenues and new drugs are the order of the day. Clinical Research involves studies world over; the effect as well as the safety of drugs needs to be studied considering the variation in the race, genetic makeup, cultures, food habits, environmental and climatic variations. The coordination, compliance and the data management requires huge manpower.

The global market is estimated to be worth over USD 52 billion. There are more than 2,50,000 positions vacant with attractive salaries. Moreover, with a dramatic increase in the number of trials being conducted worldwide; the demand for clinical research professionals is ready to reach an all-time high.

Salient Features of our Programs

- Industry based content
- Tie up with MNCs
- Experts training for nearly 240 hrs
- Mock interview and seminars
- 100% placement track record
- Soft skills training through personality development program
- Wi-fi enabled campus
- Industrial exposure

Facilities

Classroom:

The AC classrooms are specially designed to provide collaborative learning environment in which teachers and students immerse in learning environment. The class rooms redefine the way student interact with the professors. You can visit our campus personally and experience yourself the standard that we maintain to impart education keeping in mind that you are our partner and future leaders in the industry.

Computer Lab:

A Computer Centre with latest computers with LCD monitors. The institute have an internet connection at 64 KBPS to 2MBPS bandwidth .The software library is periodically updated by latest releases and versions by Microsoft. Wi- fi enabled campus helps student to use it effectively to get access to information instantly. Our dedicated tech team ensures uninterrupted operations all over the campus.

Clinical Research and 6-Sigma:

FICR trains its students on 6-Sigma Practices in Clinical Research that enables a student to have better control over Clinical Research Methodology that increases the Drug efficacy and decreases error. The students will be learning from the best 6-Sixma black belt trainers in the Industry.

Placement:

Focus Edu Care has a unique way of placement which is far ahead of the industry method & means of placement .Our Placement cell has a corporate association with more than 180 companies. We have 100 % placement track record.

Training on CDM Software:

FICR trains its students on Clinical data Management Software. OpenClinica is a free, open source clinical trial software platform for Electronic Data Capture (EDC) clinical data management in clinical research. OpenClinica is built on leading, independent standards to achieve high levels of interoperability and regulatory compliance.

Financial Aid:

Focus Edu Care has tied up with reputed National Banks & Financial Service organisations like Credila Financial services to assist student with educational loans. Process can be done at Focus Edu Care itself. Accepted candidates will be assisted in securing loan.
